Sprint Report 3 - CSE 115A - Lost@Cruz

The sprint report must contain the following elements:

- Heading: Sprint 3 Report, Lost@Cruz, Team Found, November 19, 2024
- Actions to stop doing: Our team is satisfied with the actions that we are currently doing, including meeting at least twice a week and constantly communicating on Discord as well. We also follow merge request procedures to properly merge our work. Along with that, the team is active on Discord to answer questions.
- Actions to start doing: Be more responsive when there's any issue.
- Actions to keep doing: Our team should continue communicating with each other on Discord and meet at least twice a week to update each other on their work progress. Along with that, we should also keep our Sprint plan updated so story points can be updated properly. Should continue to add comments to the code, and to inform others of what's being worked upon. Further, keep the repository clean with proper branch management.

• Work completed/not completed:

Completed User Stories:

- (Priority 1) As a user, I want to sort posts by searching/categories to focus on what item I'm dealing with [Points: 6]
 - [Task 1]: Create tags for each post and be able to view posts with those tags once they are clicked
 - Storing tags for each post
 - Have set tags, and allow users to assign custom tags to their posts
 - [Task 2]: Implement a search bar
- (Priority 2) As a person making a post, I want some advice for authentication/meeting so the item goes to the right owner and I'm safe. [Points: 4]
 - [Task 1]: Prepare a document of tips for users to safely return and retrieve lost items.

Include guidelines for

- Authentication with other users
- Meetup locations & time
- How to stay safe

Then, show the document to users who want to contact the owner on the forum and also send the document via email when a user is contacted by other users.

Partially Completed:

- Password reset

• Work completion rate:

- User Stories: 2

- Estimated idea work hours completed during the prior sprint: 20 hours

- Total number of days during the prior sprint: 14 days
